RULES AND REGULATIONS.

RULES AND REGULATIONS OF THE COUNCIL OF PUBLIC INSTRUCTION FOR THE GOVERNMENT OF PUBLIC SCHOOLS IN THE PROVINCE OF BRITISH COLUMBIA.

ARTICLE 1.

Clause 1.—The hours of teaching shall be from 9 a.m. to 12 m. and from 1 p.m. to 3.30 p.m. from March to October, inclusive; and from 9.30 a.m. to 12 m. and from 1 p.m. to 3 p.m. from November to February, inclusive. The First and Second Primer classes may, at the discretion of the School Board, be dismissed at 2.30 p.m.

NOTE.—The noon recess may in City School Districts be extended at the discretion of the School Board from 12 m. to 1.30 p.m., but in that event the afternoon session must be correspondingly lengthened.

Clause 2.—There shall be a recess of fifteen minutes, extending from 10.45 to 11 o'clock, in each morning's work during the whole year, and a recess of ten minutes, extending from 2.30 to 2.40 o'clock, in each afternoon's work from March to October, inclusive.

Clause 3.—(a.) Each pupil shall be allowed the full time allotted for recess:

(b.) In no case shall a pupil be detained after school-hours for a longer period than half an hour:

(c.) Teachers must use discretion in assigning "home" lessons to children. It is recommended that no home-work be exacted from pupils in the Primers and First Reader.

ARTICLE 2.

Every Saturday, Sunday, Good Friday, Easter Monday, Empire Day (24th May), King's Birthday, Labour Day, and Thanksgiving Day shall be a holiday. Any day proclaimed a holiday by the Lieutenant-Governor shall also be a school holiday. Holidays, proclaimed as such by the Mayors of cities, shall not be regarded as school holidays.

NOTE.—The object of Empire Day is the development of the Empire idea. Consequently, the lessons, recitations, and other exercises of the last teaching day preceding Empire Day (May 24th) should be such as to bear directly upon the history and resources of Canada and the British Empire, and tend to promote a spirit of true patriotism and loyalty. The Department has provided flags for use on all Public Schools of the Province, and the following directions regarding the care and use of the flag are expected to be observed by all principals and teachers in charge of the schools, in addition to the duties of teachers already laid down in the "Manual of School Law": The flag is to be hoisted on the school premises daily before school goes into session, and is to remain flying during school-hours. It must be taken down before the principal or teacher leaves the school premises in the afternoon. On no occasion must the flag be permitted to remain up after sundown. When removed from the pole the flag must be carefully folded and placed in the receptacle provided by the Trustees for its safe-keeping. The Trustees are expected to provide a pole for the flag, the cost of same to be paid from money voted for incidental expenses. The pole should not be less than 25 feet in height and should be placed in one of the front corners of the school-grounds. It is desirable that the pole be placed in position so that the flag may be flown for the first time on the day schools reopen, and on that day a function of a public character should take place in connection with its hoisting. This little celebration should include the singing of the National Anthem as the Union Jack is raised, a march-past of the children marshalled in rank, and might well be brought to a close by a short patriotic speech from the Chairman or other member of the Board of School Trustees. Thereafter it is expected that the flag shall be hoisted without special celebration daily before school goes into session and remain flying during school-hours. It should be flown with due ceremony when Empire Day is celebrated in the school, on the King's Birthday, and on all national holidays.

ARTICLE 3.

There shall be three vacations in each year:

(a.) In all schools throughout the Province the summer vacation shall extend from the last Friday in June to the fourth Sunday in August:

- (b.) The winter vacation shall continue for two weeks preceding the first Monday in January after New Year's Day:
- (c.) The Easter vacation shall include the four days immediately following Easter Monday.

ARTICLE 4.

Clause 1.—Teachers on the permanent staff at the close of the school-year (June 30th), who have been employed for more than half the prescribed teaching days in the year, shall be paid their usual salaries for July.

Clause 2.—Certificated teachers on the staff at the close of the year (June 30th), who have not been employed for more than half the prescribed teaching days in the year, shall be paid salary for July, provided they continue teaching during August and September following the summer vacation.

Clause 3.—When a school is closed for one or more of the prescribed teaching days in a month without authority having been first obtained from the Council of Public Instruction, salary will not be paid to the teacher for the time that the school is closed.

NOTE.—In case of the prevalence of an epidemic, illness of teacher, or other cause equally satisfactory to the Council of Public Instruction, Trustees may forthwith temporarily close the school, but immediate notification must be given the Department by the Secretary of the Board, with the reason therefor, in order to prevent a reduction of grant to teacher and district.

In case a school is summarily closed for any cause, the teacher shall not be paid salary for a longer period than one month from the date of closing. Sec. 103.

ARTICLE 5.

Teachers during temporary absence from duty must provide substitutes satisfactory to the Board of Trustees, and must satisfy the claims of such substitutes for services rendered.

A substitute cannot serve, without the consent of the Education Department, for a longer period than ten consecutive teaching days in the school-year, except in the event of sickness of teacher.

ARTICLE 6.

Clause 2.—To call the roll morning and afternoon, and otherwise to keep an accurate register in the manner prescribed by the Council of Public Instruction; such register to be open at all times to the inspection of the Trustees, Inspectors, and Superintendent, and to be handed over to the Secretary of the Trustees at the expiration of the term of services to be preserved as a district record.

Clause 3.—To furnish pupils with constant employment in their studies, and to endeavour, by judicious and diversified modes, to render the exercises of the school pleasant as well as profitable.

Clause 4.—To inquire into the cause of and record all cases of tardiness and absence of pupils.

Clause 5.—To send to the parent or guardian of each pupil a monthly report (on a form supplied or approved by the Education Department) of the progress, deportment, attendance, and punctuality of such pupil.

Clause 6.—To be present in the school-room at least fifteen minutes in the morning, and five minutes in the afternoon, before the time prescribed for beginning school; subject to the arrangement of the Board of Trustees, to see that the school-house is kept in proper order in respect to cleanliness, neatness, heating,

and ventilation; to maintain a regular supervision of the pupils in the playground and have a care that games are honourably played; to observe punctually the hours for opening and closing school, and after close of school not to leave the school-grounds until every pupil has departed, and not to allow recesses to exceed the specified time.

Clause 7.—To keep a visitors' book (which the Trustees shall provide), and enter therein the visits made to his school, and, if deemed advisable, to present such book to the visitor and to request him to make therein any remarks suggested by his visit.

Clause 8.—To receive visitors courteously.

Clause 9.—On the last day of each half-year to hold a public examination of his school, notice of which shall be given to the Trustees, and to the parents through the pupils.

To exercise vigilance over the school property under his charge, the buildings, outhouses, fences, apparatus, books, etc., so that they may not receive unnecessary injury; and to give prompt notice in writing to the Secretary of the Trustees of any supplies that may be needed for the school, or of any repairs which may be required to be made to the buildings, outhouses, furniture, etc.

Clause 11.—To keep in a conspicuous place in the school-room a time-table showing the order of exercises for each day in the week, and the time devoted to each subject per day.

Clause 12.—Not to be absent from school, unless in case of sickness, in which case the absence is to be immediately reported to the Secretary of the Board of Trustees.

N.B.—All absences, with reasons for the same, shall be reported monthly to the Superintendent of Education.

Clause 13.—To report promptly to the Trustees the appearance of any infectious and contagious disease in the school, or unsanitary condition of the outhouses or surroundings.

Clause 14.—To have special care as to the use of school books and apparatus, registers, and maps, the neatness and order of the desks, and to reimburse the Trustees for any destruction of school property by pupils which is clearly chargeable to gross neglect or failure to exercise proper discipline on the part of the teacher.

Clause 15.—In schools where more than one teacher is employed, to attend all meetings of the teachers called by the Principal.

Clause 16.—To render every assistance required of him by the Superintendent of Education or Inspectors, in promoting, examining, or classifying pupils.

Clause 17.—To verify by affidavit, before any Justice of the Peace, the correctness of such returns as the Superintendent of Education may, from time to time, require to be so verified; and to furnish the Board of Trustees, when solicited by them or their Secretary, every reasonable assistance in making the returns required by the Education Department.

Clause 18.—To furnish to the Superintendent monthly, or when desired, any information which it may be in his power to give respecting anything connected with the operation of his school, or in anywise affecting its interests or character.

Clause 19.—Not to detain any pupil in school during the hour's intermission at noon, and, except in extreme cases, to avoid detention after hours.

Clause 22.—To make himself familiar with the "Schools Act" and the "Schools Health Inspection Act."

ARTICLE 7.

Every teacher shall practise such discipline as may be exercised by a kind, firm, and judicious parent in his family, avoiding corporal punishment, except when it shall appear to him to be imperatively necessary, and then a record of the offence and the punishment shall be made in a register used for the purpose, which records shall be open to inspection by the Superintendent of Education, the Inspectors, and the Trustees.

ARTICLE 8.

When a pupil is persistently disobedient, or addicted to any vice likely to affect injuriously the character of other pupils, it shall be the duty of the teacher to report the case to the Trustees, who may suspend or expel such pupil from the school; and any pupil thus suspended or expelled shall not be admitted to the school until the Trustees and teacher shall receive from such pupil assurance of reform as openly and explicitly as the case may require.

ARTICLE 9.

The Principal of a school (subject to the provisions of sections 8, 9, 10, "Public Schools Act") shall have supervision over the time-tables, exercises, methods, and general discipline pursued in all its lower grades, and over the conduct of all the pupils as committed to teachers generally by these Regulations; and it shall be competent for the Principal, in his discretion, to exercise, on occasion, paramount authority in discipline, and to administer the same.

ARTICLE 10.

Clause 1.—It shall be the duty of the Principal of every Public School to convene, at least once a month, a meeting of his assistants, for conference on all matters affecting the proper management of each division, with a view to securing not only uniformity in discipline and instruction, but also the adoption of the best approved methods. NOTE.—Whether voting shall be open or by ballot should be determined by the voters present.

- (6.) *Voters.*—In case objection is made by a legal voter to the right of a person to vote, the Chairman shall require the person whose vote is questioned to make the declaration provided by law; after making it, the vote must be received and recorded without further question; but if such person refuses to make such declaration, his or her vote is to be rejected; penalty for false declaration, section 91:
- (7.) *Protests.*—Any irregularity in the mode of electing a Trustee shall not invalidate the election, unless formal protest is taken thereto by a

qualified voter before the adjournment of the meeting, if the person so elected possesses the qualifications required by the "Schools Act" for the office of Trustee, section 101:

- (8.) *Adjournments.*—A motion to adjourn a school meeting shall always be in order, provided that no second motion to the same effect shall be made until some intermediate proceedings shall have been had:
 - (9.) *Motion to be made in writing (if required) and seconded.*—A motion cannot be put from the chair, or debated, unless the same be in writing (if required by the Chairman) and seconded:
 - (10.) *Withdrawal of motion.*—After a motion has been announced or read by the Chairman, it shall be deemed to be in possession of the meeting, but may be withdrawn at any time before decision, by consent of the meeting:
 - (11.) *Kind of motion to be received.*—When a motion is under debate, no other motion shall be received, unless to amend it, or postpone it, or for adjournment:
 - (12.) *Order of putting motion.*—All questions shall be put in the order in which they are moved. Amendments shall be put before the main motion, the last amendment first, and so on:
 - (13.) *Reconsidering motion.*—A motion to reconsider a vote may be made by any voter at the same meeting; but no vote of reconsideration shall be taken more than once at the same meeting.

The reason for serving you with this notice is [state here the cause].

Yours truly,

.....Secretary.

NOTE.—Notice of removal and dismissal of a teacher must be given at least thirty days before the close of the school term. In case of resignation, a teacher must give at least thirty days' notice to the Trustees, such notice to terminate with the close of the school term, or to be given within ten days after the close of the annual school meeting.

GENERAL DIRECTIONS TO TRUSTEES.

On pp. 45-49 will be found references to the sections of the "Schools Act" which bear most directly upon the duties and responsibilities of School Trustees. The forms given in the preceding pages will be found convenient for use in the discharge of official duties.

1. The Trustees represent the inhabitants of the district, whether city or rural, and are to transact all school business in their stead and on their behalf. The interests of education cannot thrive in any section or district unless these officers efficiently and faithfully discharge their duties. A faithful discharge of the duties of a Trustee will require no small labour. But every community may fairly claim the services of its best men and women in a matter of such interest and importance. Besides, provision is made for the retiring of one or more of the members of the School Board annually.

2. By the provisions of sections 45, 110, it is made the duty of the Board of Trustees of the City and Rural Districts to provide school privileges free for all children of the district, and to contract with teachers. Every Board of Trustees shall exercise all its powers under the law in a wise discharge of these duties, submitting a clear report of the educational condition of the district, the receipt and expenditure of all school moneys, and the amount that the Trustees estimate to be required for the due discharge of their duties for the year. In the case of Rural Districts, it is for the annual meeting to add to or diminish this estimate according to its best judgment of the requirements of the district. In City and District Municipality School Districts, the detailed estimate of the sums required by the Board is to be laid before the Council on or before the first day of February in each year.

3. The Board of Trustees of a City or District Municipality School District is required by Statute to meet at least once a month; that of a Rural District at least once in every three months. All business transactions of a School Board, to

be legal, must therefore be considered and passed upon at a regular or special meeting of such Board, of which each member has had proper notice. It is competent for a majority of the Board of Trustees, all the members having proper notice of the meeting, to transact business. Minutes of each meeting, and of all orders of the Board, should be carefully made, duly approved, and permanently preserved. The careful observance of this rule will prevent many disputes and difficulties.

The Board of Trustees, whether municipal or rural, should at its first meeting after the annual election determine upon the time and place for its *regular* meetings during the school-year. The by-laws which Municipal School Boards have power to make (section 49) usually contain such a provision. When this is done, no further notice will be required to be given of any regular meeting to members of the Board of Trustees. Whenever a *special* meeting of the Board becomes necessary, each member of the Board must be notified of the date, place, and object of the meeting.

4. Trustees cannot give authority to teachers to violate in any particular the Rules and Regulations for the government of the Public Schools.

5. *Trustees cannot appoint or retain as teacher a person who does not hold a certificate of qualification from the Education Department of this Province. Section 119.*

6. Notice of appointment of a teacher to a school should be given him in writing, such notice specifying the day on which his duties as teacher begin.

7. Notice of intention to dismiss a teacher must be given him in writing at least thirty days *before the close of term*, and the reason or reasons therefor must be stated in such notice.

8. Notice of the appointment, resignation, or dismissal of a teacher must be *forthwith* transmitted to the Superintendent of Education, with the date on which the appointment, resignation, or dismissal takes effect. In the case of dismissal, the reason or reasons must be stated by the Trustees in such notice to the Superintendent.

9. Trustees should see that the school-house is kept in good repair; that at the proper season the stove and pipe, furnace or fireplace are in good condition, and that suitable wood or coal is provided; that the school-room is properly swept and dusted; that the desks and seats are in good repair; that the outhouses are properly provided with doors; that the blackboards are kept painted, the water-supply abundant, and that everything is provided necessary for the comfort of the pupils and the success of the school.

Directions for the Cleanliness of the School-room.

- (a.) Have the school-room, halls, and entries swept every day.

NOTE.—Every good housekeeper sweeps her house every day. How much more necessary is it in a building where many children are crowded together for six hours a day, and into which dirt and germs are dragged from every part of the section?

- (b.) Raise the windows while sweeping, and keep them raised for some time afterward.

NOTE.—By keeping the windows open, much of the dust will blow out.

- (c.) Before sweeping, sprinkle the floor with damp sawdust; don't use water.

NOTE.—Sawdust is the best substance, and can generally be easily obtained and kept in barrels. It keeps the dust from rising and settling again after the room is swept. Sprinkling with water simply binds the dust to the floor ready to rise again as soon as dry.

- (d.) At least an hour before school opens the school-room should be carefully dusted, especially the tops of desks, seats, window-ledges, etc.

- (e.) The school-room should be thoroughly scrubbed at least every month.

NOTE.—If scrubbing, perhaps every week, is necessary in our homes, how much more so in our school-rooms, where there are so many to drag in dirt? Besides, dust is even more dangerous to children than to grown persons.

- (f.) Once a year the walls, floors, desks, etc., should, after being scrubbed, be wetted over with a mixture of carbolic acid and water, four teaspoonfuls of the acid to a pint of water.

NOTE.—Such a cleansing of the school-room would kill all germs, and if this could be done at the Christmas vacation (germs are more virulent in winter), it would go far toward the health of the school.

10. No public school-house or school-plot, or any building, furniture, or other thing pertaining thereto, should be used or occupied for any other purpose than for the use or accommodation of the public school of the district, without the express permission of the Trustees as a corporation, and then only after school-hours, and on condition that all damages be made good, and cleaning and sweeping properly done.

The teacher has charge of the school-house on behalf of the Trustees. He has no authority to use the school-house other than as directed by them; or to make use of it at any other time than during school-hours without their sanction. At the request of the Trustees he must at once deliver up the school-house key to them.

11. The annual report required of Trustees must be received at the Education Office within the time provided by law. The penalty for delay is stated in section 23. The returns referred to in section 45, 114 (b) must be verified by affidavit before any Justice of the Peace.

NOTE.—The following are the reports required: Report of Annual School Meeting, sec. 90; Trustees' Annual Report (Municipal District), sec. 45; Trustees' Annual Report (Rural District), sec. 114 (b).

12. Hereafter it shall be the duty of the School Trustees of each district to see that the provisions of the "Health Act" and the "Schools Health Inspection Act" are carried out as regards the pupils attending school in their district.

COURSES OF STUDY.

COURSE OF STUDY PRESCRIBED FOR GRADED AND COMMON SCHOOLS.

(REVISED SEPTEMBER 1ST, 1913.)

Junior Grade.

1. **Reading**—First and Second Primers, Gage's Phonic Primer, First Reader and Second Reader. Recitation and Supplementary reading from authorized texts. Phonic drill to be continued to the end of the Second Reader.
2. **Writing**—Classes in the First and Second Primers and in the First Reader should be taught the correct form of written letters from examples placed on the blackboard. There should also be graded written exercises. Throughout these blackboard lessons the forms of the letters taught should be those given in the prescribed copy-books. First Primer classes should use New Method Writing-pad No. 1, one per term. Second Primer classes should use New Method Writing-pad No. 2, one per term. Second Primer classes should also use New Method Writing-book No. 1; First Reader classes should use New Method Writing-book No. 2; and Second Reader classes should use New Method Writing-books Nos. 3 and 4. Muscular-movement exercises to be commenced in the Second Reader.
3. **Drawing and Manual Work**—

PAPER FOLDING AND CUTTING.

First and Second Primers.—To acquire dexterity and skill of hand by constructing and making objects; to gain a knowledge of the forms, triangle, square, oblong, etc.; to know right side, left side, front, back, edge, corner angle; to know such terms as turn, fold, etc.; and, in short, to increase the vocabulary of the child and assist the language lesson.

Exercises selected from such work as Mat-weaving, Plasticene Modelling, Raffia-work, and Colour-work will be valuable in helping to form habits of accuracy, neatness, order, and inculcate a love of industry and habits of patience, perseverance, and self-reliance.

Text-book.—Educational Handwork, T. B. Kidner (published by Educational Book Co.), for use of teacher only.

Suggested Syllabus from above Book.

First Primer.—First folding exercises, page 18. Stars, page 25. Frames, page 26.

First Primer and Second Primer.—Second Key form, page 30. Pattern-making, 34, 35. Cutting leaves, fruit, and objects. Cut the crosses of St. George, St. Andrew, and St. Patrick.

Second Primer.—Constructive work, page 42. Patterns 1, 2, 3, 4, 5, 8.

Use some of these exercises for drawing lessons. None of the measurements should be less than half an inch.

Paper Folding and Cutting Materials, No. 204. For Constructive work, No. 2192, Milton Bradley Co.

PLASTICENE MODELLING.

(See Educational Handwork—Kidner.)

Begin by modelling a sphere, then develop it into a square, rectangle, triangle, circle, semicircle, oval, cylinder, cube, cone, pyramid.

COURSES OF STUDY.

Turn these Type models into some object having a similar form; for instance, the cylinder into a can, the cube into a house, or a sphere into a vase. Focus the attention on the form or shape to be made.

MAT-WEAVING.

Good book on the subject: *Primary Work*. By Wilhelmina Seegmiller. (Published by Atkinson, Mentzer & Grover, Chicago.)

Mat-weaving paper, No. 1110. Weaving-needles, No. 395. Milton Bradley Co.

BRUSH-WORK.

For a series of lessons in Colour-work and for information on the teaching of the subject, see the page headed "A Series of Lessons in Colour-work."

An excellent work on the association of Brush-work with the language lesson: *Nature Studies and Fairy Tales*. By C. I. Dodd. (Published by Thomas Nelson & Sons, Edinburgh.)

NOTE.—Use Reeves' Three-colour Box.

DRAWING.

In drawing with the pencil, develop a free light touch, a movement similar to that used when working with a brush. The command of the hand thus gained will help the writing, which should also be done lightly. Heavy pressure prevents freedom of movement in forming the written letters, as well as in making good forms while drawing.

First Primer.—Text-book of Art Education (Prang), Books I. and II., for teacher only.

Second Primer.—Text-books of Art Education (Prang), Books II. and III., for teacher only.

First Reader.—Text-books of Art Education, Books III. and IV., for teacher only. Pupils should have prescribed Drawing-book No. I.

Second Reader.—Text-book of Art Education, Book IV., for teacher only. Pupils should have prescribed Drawing-book No. II.

In drawing from objects, begin with those which are flat, having no perspective. These lead to cylindrical objects, then to cubical, in the upper grades.

In the First Primer classes draw a great deal from description. The main object should be to use the materials freely and with assurance. Later on insist on greater accuracy of reproduction.

When the Junior Grade is completed, pupils should be able to measure from half an inch upwards.

Also know without hesitation the following:—

vertical	quadrant
horizontal	oval
angle	cube
triangle	sphere
square	cone
rectangle or oblong	pyramid
circle	perimeter
semicircle	

Good Books on Drawing and Painting for the Teacher.

Text-books of Art Education (Prang), Books I. to VII.

Augsburg's Drawing Series, Bks. I., II., III. (Educational Publishing Co., Toronto.)

A Course in Water Colours for the First Eight Years in School (Prang).

Practical Notes on Colour-mixing for School Teachers. By an Expert. (Reeves. Price sixpence. London, Eng.)

Monthly Magazine—The School Arts Book. (Price \$1.75, post free to Canada. School Arts Co., 120 Boylston St., Boston.)

Read notes on page headed "Pointers for the Teacher." Teachers should select from the foregoing Course what they consider best suited to the individual requirements of their classes. The full Course in Drawing and Brush-work must, however, be taught in all graded schools. Moreover, the work in Paper Folding and Cutting, Plasticene Modelling, and Mat-weaving must be undertaken in all city schools of the first class, and in all other graded schools where the work is recommended by the Provincial Inspector of Schools. Boards of School Trustees are expected to provide necessary materials.

4. **Language Lessons**—In connection with the reading of the Junior Grade it is suggested that the pupils form oral sentences containing the new words used in the reading lessons; that there be frequent drills in enunciation, articulation, inflection, and emphasis; that oral and written spelling be begun in the First Primer classes; that the teachers hold with their classes frequent conversations growing out of observation of pictures, plants, animals; etc.; that there should be frequent oral reproduction of stories read or related by the teacher; memorization of selected passages; the correction of prevailing errors of speech at the time they are made, with drill for the formation of habits of correct expression; that the names of the days of the week and of the seasons of the year be taught as well as the abbreviations and contractions found in the readers; that pupils be taught to divide into syllables the words in their readers and to mark the accent; that pupils in the Second Reader be required to give simple written reproductions consisting of one paragraph only; that there be simple exercises in word-building; that the significance of simple prefixes and suffixes be taught as well as the common use of capitals and punctuation marks; and that there be frequent transcription and dictation exercises.

5. **Arithmetic**—Milne's Arithmetic Book I., to end of page 156 (for use of teachers only). The following grading of the work for the Junior Grade Course is suggested:—

FIRST PRIMER. (The *one-unit*.)

- (1.) Study of the numbers 1 to 9 inclusive; teaching the number, names, oral and written, and the figures, with a clear knowledge of their significance; combinations of these 9 numbers (this includes the teaching not only of addition, but also the application of the other three simple rules to these numbers); oral counting to 99.

SECOND PRIMER. (The *ten-unit*.)

- (1.) Study of the ten-unit, its meaning and notation, and of the ten series, 10, 20, 30, etc., to 90.
- (2.) Reading and writing numbers to 99.
- (3.) Combinations of the numbers 1 to 20.

FIRST READER. Milne, Book I., to end of page 54 (for use of teacher only).

- (1.) *Extensions of the combinations:*

- (a.) Combinations of the tens, Milne, Book I., page 14, sec. 9.
- (b.) Such extensions as those found in Milne, Book I., page 12, Part I.

- (2.) Multiplication tables to end of table of fives, with easy oral exercises implying multiplication and division; but no formal multiplication or division to be required.
- (3.) Addition and subtraction within the number limit.
- (4.) Easy fractions and familiar measures as in the section of text-book assigned.

SECOND READER. (The *hundred-unit* and *thousand-unit*.) Milne, Book I., to end of page 156.

- (1.) Reading and writing numbers to 10,000.

- (2.) Review of combinations and extensions, with application to the hundred-unit and thousand-unit.
- (3.) Multiplication tables.
- (4.) Addition and subtraction within number limit.
- (5.) Multiplication and division by one figure.
- (6.) Easy fractions and familiar measures as in text-book.

NOTE.—The arithmetic-work of the first two years (of the first year, particularly) should be characterized by the free use of objects, constructive exercises, picture numbers, etc., in order to develop clear number ideas with the aid of sense perceptions. Throughout the Junior Grade the knowledge of numbers should be applied in many and varied concrete problems of a simple kind. These problems should be largely oral. There should also be systematic practice in mental arithmetic in the prescribed course. The text-book should not be placed in the hands of the pupils of the Junior Grade, except in the case of pupils in rural schools, and then only in the case of pupils doing the third-year work outlined above.

References: "Primary Arithmetic," by McLellan and Ames (The Copp, Clark Co., Toronto); "Elements of Arithmetic," by Ella M. Pierce (Messrs. Silver, Burdett Co., Boston).

6. Nature Lessons (to be correlated with the Language and Drawing Lessons)—

- (a.) FORM—Cube, sphere, cylinder, and cone; square, triangle, and circle; horizontal, vertical, and oblique lines; right, acute, and obtuse angles. Illustrate by models and familiar objects, natural and manufactured.
- (b.) PRIMARY COLOURS—Illustrate from charts, flowers, fruit, insects, etc.
- (c.) PLANTS—The root, stem, flowers, and fruit; uses of familiar plants for food, clothing, medicine, and building material.
- (d.) ANIMALS—The mouse, cat, dog, horse, cow, sheep, and pig; resemblances and differences in structure and mode of life.

NOTE.—In the Junior Grade much is left to the discretion of the teacher. The curriculum gives only a bare outline of what is required, thus leaving the thoughtful teacher as free as possible, merely insisting that regular and systematic instruction shall be given in the subject.

All nature lessons to the Junior Grade should be looked upon by the teacher as means for conveying and fixing collateral knowledge, rather than for conveying direct information, although the latter may be accomplished at the same time.

The first lessons should be on lines, angles, surfaces, and solids. Illustrate these by objects, drawings, movements of hand, allusion to familiar objects, until the name and the idea are naturally linked together, but on no account let the name be given until the idea has been obtained. The parts of a plant must be taught from the plant itself. Stories of useful or common animals will interest and instruct the class, and can be utilized as groundwork for future language lessons.

7. Geography—

- A. HOME GEOGRAPHY—Lessons on the district surrounding the school. Observation by pupils under the direction and encouragement of the teacher. The aim is not so much to impart information as to cultivate clear and discriminating powers of observation. "Our Home and Its Surroundings" (Morang) may be used by the teacher as a guide. (NOTE.—Omit chapter on Government.) The lessons should be conversational. Stories and pictures should be largely employed. Outline plans or maps of (a) the school-room, (b) school-house and grounds, (c) district surrounding the school. Points of compass to be marked on these and relative distance and proportion to be observed.
- B. THE EARTH AS A WHOLE—Form of the earth. General idea of its size. Daily and annual motions—simple connection of time with these. The cause of night and day; the year taught as the time taken by the earth to complete its revolution around the sun. Classification of the months according to the seasons, but no attempt made to teach cause of the seasons or of the varying length of night and day. The names and relative positions of continents and oceans.

NOTE.—It is expected that before entering the Intermediate Grade the pupil, from his observation of his home district, the pictures and the sandboard used in the lessons at school, will be familiar with the common geographical terms, such as: continent, ocean, mountain, valley, river, tributary, plain, cape, peninsula, island, etc.

Intermediate Grade.

1. Reading—Third Reader and (for supplementary reading) Progressive Road to Reading, Book IIIA. Recitation and Supplementary Reading.

2. **Writing**—New Method Writing-books Nos. 5, 6, 7, and 8.. Muscular-movement exercises to be continued in this grade.

3. **Drawing**—The pupils should have compasses and set-squares, 45° and 60°. Ruler, hard pencil H, and soft pencil B. Prescribed Drawing-book III.

Before entering the Senior Grade, pupils should be able to measure inches, halves, quarters, eighths, centimetres, and millimetres.

Exercises should be given in using set-squares, drawing parallel lines, and setting out measurements exactly.

They should know without hesitation the following:—

square	angles
rectangle or oblong	triangles
sphere	acute angle
oval	obtuse angle
perimeter	right angle
parallel lines	altitude
parallelograms	base
cube	circle
triangular prism	number of degrees in a circle
square prism	quadrant
cone	semicircle
cylinder	circumference
pyramid	arc
diagonal	radius
diameter	radii

All these terms are used in Milne's Arithmetic, Book II., up to page 145, as required in this grade.

DRAWING.

In this grade cylindrical objects should be mastered. The plain cylinder should be looked upon as the type model only. The application of its principles to common every-day objects should be pointed out. The correct drawing of a cylinder is therefore only a means to an end. The teacher should not wait too long before trying to apply the principles learned.

Draw from memory frequently. The highest success is attained when those who are taught not only draw correctly, but enjoy drawing and make use of drawing habitually.

Drawing and Nature Study should be closely correlated.

The name, initials, and date should be neatly placed on every sheet.

NOTE.—Principles to be observed in drawing cylindrical objects:—

- I. The circle in perspective appears as an ellipse.
 - II. The ellipse appears more nearly circular as it falls below the level of the eye.
 - III. The ellipse appears more nearly circular as it rises above the level of the eye.
 - IV. The ellipse is equal in width on each side of its diameter.
 - V. The axis of a cylindrical object and the diameter of the top and bottom are always at right angles.
 - VI. The object should always be drawn out first, lightly and freely; then tested by drawing the construction lines—i.e., the axis and diameters.
- Read over carefully "Six Steps in Drawing for the Teacher."

COLOUR-WORK.

If no Colour-work has been done before reaching this grade, begin with the Primary Grade work.

The ruler and set-square exercises and brush-work should be correlated. Let the squares, oblongs, or circles be drawn geometrically, i.e., with the ruler, set-squares, and compasses; and without erasing any lines whatever,

paint in the brush forms. The construction lines give guidance to the brush. Read over carefully the "Three Steps in Colour-work for the Teacher."

Brush-work and Nature Study should be closely correlated. The studies from real flowers and fruit may then be adapted to the geometrical construction.

Draw out and colour the cross of St. George, the cross of St. Andrew, and the cross of St. Patrick.

Draw out to measurement and colour the Union Jack.

(See Our Flag, What it Means. By Major W. J. Wright, Brockville, Ont.)

CONSTRUCTIVE WORK.

(From Educational Handwork—Kidner.)

These are Measuring exercises; exact workmanship must be insisted on. Thin cardboard or very stout paper to be used.

The following form good Home-work:—

Envelope Exercise 18 (Kidner).....	page	80
" " 21	"	84
" " 26	"	92
Cube	"	134
Square prism	"	135
Triangular prism	"	118
Square pyramid	"	136
Cylinder	"	138
Cone	"	139

Use these solids for the drawing lesson.

4. **Language Lessons**—Language lessons based on the reading lessons. Spelling, meaning, and pronunciation of words, with special attention to word formation.

The division of a composition into paragraphs should be studied from suitable models in the Reader, and the knowledge thus gained by the pupils applied to their own compositions, both oral and written. Special attention to oral reproductions in paragraphs. (This should precede any written composition.) Oral and written reproductions of substance of reading, geography, history, and nature lessons.

Gage's First Steps in English; Lessons 1 to 60, omitting Lesson 56. Emphasis to be laid on the use of language forms in sentences rather than on the teaching of formal grammar.

Universal Spelling Book, Part I. Spelling of all words used in reading lessons, geography lessons, etc.

5. **Arithmetic**—Milne, Book I., from page 157 to end of book, and Book II. to end of page 145. (Omit pages 121 to 126, except the rectangle.)

The following grading of the work for a two years' course is suggested:—

FIRST YEAR—Milne, Book I., page 157 to end of book.

SECOND YEAR—Milne, Book II., to end of page 145 (omitting pages 121 to 126, except the rectangle).

Requirements at the end of the Intermediate Grade—Accurate and intelligent knowledge of the notation and numeration of numbers, including an intelligent understanding of the system of notation in integers, decimals, and common fractions. Accuracy and reasonable rapidity in operations in addition, subtraction, multiplication, and division as applied to integers, decimals, and common fractions. Ability to solve mental arithmetic questions with rapidity and precision.

6. **Geography**—

1. Further study of the earth as a whole—the position of the Equator, latitude, longitude, the Tropics, the Arctic and Antarctic circles, the relative position of the continents and oceans reviewed.

2. NORTH AMERICA—Suggested method:

(a.) Position—

(i.) On the globe.

(ii.) In relation to other continents and to the oceans.

(b.) Size. (Comparatively.)

(c.) Shape. (Triangular.) Make some study of the coast-line, teaching some of the more important coast features.

(d.) Build—

(i.) Teach important highlands:

(1.) Primary highlands.

(2.) Secondary highlands.

(ii.) Teach Great Central Plain:

(1.) The basin of the Mackenzie.

(2.) The basin of the Nelson.

(3.) The basin of the Mississippi.

(iii.) Teach basin of the St. Lawrence.

(iv.) Teach Atlantic Slope.

(v.) Teach Pacific Slope.

NOTE.—The above will be taught from the globe, the sandboard, plasticene model or relief map, and afterwards from the blackboard sketch, the pupil being frequently referred to and taught to interpret the wall maps. Memory map.

(e.) A series of oral lessons taking the pupils in imagination through the different districts of the continent. In these they see the people at work, learn something of the climate and products of the different districts, and learn the names and location of the great commercial centres. No attempt will be made to teach much concerning the causes affecting climate, but from observation they will learn (a) that nearness to the Equator (latitude) affects climate, (b) that nearness to a large body of water affects climate, (c) that height of land above sea-level affects climate. They will learn the characteristic products of the different districts—wheat on the Canadian prairies; corn and cotton in the Mississippi Valley; lumber and fruit on the Pacific Slope, with tropical fruits farther south. In connection with these products a commercial centre will be taught. They will thus learn the location of such cities as Victoria, Vancouver, Edmonton, Regina, Winnipeg, Ottawa, Toronto, Montreal, Quebec, Halifax, St. John, New York, St. Louis, New Orleans, and San Francisco.

(f.) The political divisions—Canada, United States, Mexico, and Central America.

3. BRITISH COLUMBIA.—A careful study of the position of the Province in the Dominion of Canada—its size—build (drainage)—a general idea of its climate, and some of the industries, the chief cities, and some of the more important transportation routes. The drawing of the map from memory.

4. SOUTH AMERICA.

5. AFRICA.

6. EUROPE.

7. ASIA.

8. AUSTRALIA.

NOTE.—In teaching these continents, follow the above order and the plan suggested for North America, omitting the political divisions. In each case the study will be comparative. Much less time will be spent on these than on North America. The pupils should, however, before leaving the Intermediate Grade, have a clear idea of the position and general build of each continent. They should know something of the great plains, and life on these plains, and be able to locate the great commercial centres of the world. The following Geographical Readers are recommended for the teacher: Carpenter's Geographical Readers (American Book Co., New York); The World and Its People (Thos. Nelson & Sons, London); Reynolds' Regional Geography (Adam & Chas. Black, London).

7. History—The objects of the teaching of History in the Intermediate Grade are: To create an interest in the subject; to cultivate a taste for reading it, and, incidentally, to make the pupil acquainted with many of the facts of History that will be of value in his work in the Senior Grade.

The biographies and topics suggested are taken mainly from the early history of Canada. "Canada's past is more dramatic than any romance ever penned," and the story of the work of the men and women and of the heroic incidents of this past supply us with our most valuable material for this grade.

This method of treatment is suggested:—

1. The story told by the teacher.
2. Questioning by the teacher leading the pupil to organize and group the facts into paragraphs.
3. Oral reproduction.
4. Written reproduction.

Topics suggested:—

CANADA.

1. Indian Tribes. (Giving a picture of life in North America before the coming of the white man.)
2. Columbus. (Not to be taken before the pupil has sufficient knowledge of the relative position of the continents to enable him to understand something of the desire of the people of Western Europe to find a shorter path to Eastern Asia.)
3. John and Sebastian Cabot.
4. Cortes and Montezuma. (Not a complete account of the Conquest of Mexico, but two or three stories to give a picture of the civilization of the Aztecs and of the Spanish gold-seekers.)
5. Cartier.
6. Drake.
7. Champlain.
8. Hudson.
9. Capt. John Smith.
10. Pilgrim Fathers.
11. William Penn.
12. Jesuit Missions.
13. Dulac des Ormeaux.
14. Radisson.
15. Marquette.
16. La Salle.
17. Madeleine Vercheres.
18. Verendrye.
19. Wolfe.
20. Lord Selkirk.

BRITISH COLUMBIA.

1. Capt. Cook.
2. Capt. Meares.
3. Nootka Affair.
4. Capt. Vancouver.
5. Sir Alexander Mackenzie.
6. Simon Fraser.
7. David Thompson.
8. The Gold Rush.

THE BRITISH EMPIRE.

In Africa.

1. Mungo Park.
2. The Dutch Settlements.
3. Livingstone.
4. Stanley.

5. Cecil Rhodes.
6. Lord Roberts.

In Europe.

1. A Visit to the Early Britons.
2. The Coming of the Romans.
3. A Visit to Roman Britain.
4. The Coming of the English.
5. A Visit to an English Village.
6. The Introduction of Christianity.
7. The Vikings.
8. Alfred the Great.
9. A Visit to Normandy.
10. The Norman Conquest.
11. A Visit to a Norman Castle.
12. A Tournament.
13. Richard of the Lion Heart.

NOTE.—The teacher will find material for these lessons in "Highroads of History," Book 4; also in "The Story of the British People" (Copp, Clark Co., Toronto).

In Asia.

1. Clive.
2. Hastings.

In Australia.

1. Capt. Cook.
2. Explorations in Australia. (Sturt and Eyre. One or two lessons only.)

NOTE.—No attempt will be made to deal exhaustively with the biographies and topics suggested. They must be presented in such a way as to arouse the interest of the children. In the Intermediate Grade at least, History that is not interesting is not History at all. In dealing with the various biographies, the aim will be, not so much to teach the facts connected with the man's life, but to present a vivid picture of the times in which he lived and thus cultivate the imagination of the child.

As indicated in the course in English, the oral History supplies much of the material for composition, both oral and written. The ability of the child to reproduce must be considered in presenting the lesson. The class just entering the Intermediate Grade is learning to tell or write stories of greater length than one paragraph, while the class completing the work of this grade has acquired considerable skill in writing compositions containing several paragraphs. Obviously, this will influence the teacher, not only in selecting the material, but in the method of presentation.

Throughout, wherever possible, the History and Geography of this grade must be correlated. Thus, while studying the basin of the Mackenzie River in Geography, the lesson in History will be on Sir Alexander Mackenzie, and while studying the basin of the Columbia River the History lesson will deal with David Thompson.

Although no formal text-book is prescribed for this grade, yet the use of a carefully selected supplementary Historical Reader, such as the *Highroads of History*, may be used with advantage after an interest has been aroused by the oral lessons.

The following books will supply the teacher with much of the material:—

Gateways of History. (Edward Arnold, London.)
 Highroads of History. (Nelson & Sons, London.)
 Canada: The Empire of the North. (Laut. Ginn & Co.)
 Cortes and Montezuma. (Pratt. Educational Book Co.)
 Johnson's French Pathfinders in North America.

8. Nature Lessons (in correlation with Drawing)—

- (a.) The work to be based on Brittain's Elementary Agriculture and Nature Study, pages 1-114, inclusive, as well as the four paragraphs on *weather observations* found on pages 186 and 187 (old edition, pages 240 and 241); at least two half-hour lessons a week. Teachers should keep notes on these oral lessons, with the dates on which they were given.
- (b.) Oral lessons to promote habits of health and temperance.

NOTE.—The purpose of these oral lessons will not be accomplished unless they lead the children to *first-hand* knowledge of Nature; the topics selected must therefore be such that the facts to be learned may be observed by the pupils themselves. The lessons must be intelligently and systematically planned, and the method followed must be that of *discovery through observation*.

In the Intermediate Grade the teacher is provided with a text-book, and the portion of this to be studied has been carefully selected. In this grade instruction is entirely oral, and the teacher must arrange an order of work according to seasons—it is not required that the book is to be taken chapter by chapter in due order. This training will furnish a foundation for the Nature Lessons of the Senior Grade.

Senior Grade.

1. **Reading and Literature**—Fourth Reader. Scott's *Lady of the Lake*. Memorization: Selections from the Fourth Reader, and the following from the *Lady of the Lake*:—

Canto I.—Sections 1, 2, 9, 11, 12, 14, 15, and 18;

Canto II.—Section 19;

Canto III.—First stanza of Section 1, Sections 2 and 16;

Canto V.—The last eight lines of Section 30;

Canto VI.—Section 15 and the last three stanzas of the Canto beginning, "Harp of the North, farewell!"

Pupils will also memorize short portions of special merit from other stanzas of the poem. (The examination paper in English Literature will test the pupil's knowledge, not only of Scott's poem, but also of the prose and poetical selections in the Fourth Reader.)

2. **Writing**—Prescribed Copy-book Series, Nos. 8 and 9. Muscular-movement exercises to be continued, the aim being to give freedom of execution. Legibility and precision required in all manuscript-work.

NOTE.—In judging the subject of writing, instead of awarding marks on the writing of one paper only, the value will be determined by giving 50 per cent. to the writing as shown on the Dictation paper, and 50 per cent. to the writing and general neatness of execution of the other written papers.

3. **Drawing**—Master the drawing of cubical objects as well as cylindrical. Prescribed Drawing-books required, Books IV. and IVA., omitting problems in Practical Solid Geometry, 15-26 inclusive. Draw from memory frequently.

NOTE.—Principles to be observed in drawing cubical objects: A square or oblong surface held horizontally on a level with the eye will be seen as a straight line. As it rises above or falls below the level of the eye more of the surface will be seen. Objects of equal size will appear less as they vary in distance from the spectator. The "Six Steps in Drawing" must be observed by the teacher.

Read Text-books on Art Education, Books VI. and VII. (Prang); or, Drawing for High Schools (Prang).

COLOUR-WORK.

To develop freedom and control of the hand, the brush is unexcelled. In training taste for good form, proportion, and an appreciation of free radiating curves and forms, the flexible point of the brush is perfect.

The teacher will find the exercises help the writing.

The Geometrical, Colour, and Nature work should be correlated. Let the designs be based on geometrical constructions.

Encourage the pupils to recognize colour schemes in the flowers, insects, birds, etc. Adapt these schemes to their own designs. Keep the work simple.

Study the notes for teachers on Colour-work.

Reference works: Practical Notes on Colour-mixing for School Teachers. By an Expert. (Reeves. London, England. Price 6d.) A Course in Water Colours for the First Eight Years in School. (Prang.)

GEOMETRICAL DRAWING.

Book IVA.

Draw with an H or HH pencil. See that the compasses are in good condition and pencils sharp. Have two pencils, one for the compass and one to use with the ruler.

Do not allow the pupil to take the compass-pencil out to use with the ruler.

Construction lines must be light. Result of problem clear and distinct. No erasing, if possible.

After teaching three or four problems, originate one of your own, based upon the problems taught.

Give this as a dictation exercise, thus: Draw any triangle. Letter it A, B, C. Bisect each side and draw bisectors until they meet in one point. Mark this point D. With D as centre and DA as radius, describe a circle.

The circle should pass exactly through points A, B, C. Or put some figure on the board, taking care to hide its construction. Let the class find out how it is made.

Pattern-work should be simple, and should really be the application of geometrical problems previously taught.

Insist on accuracy, good workmanship, and a knowledge of the geometrical problems.

Correlate Brush-work and Geometry as much as possible.

ON THE MAKING OF WORKING DRAWINGS.

Before drawing plans and elevations in Book IVA., give some smart drill to the class on practice paper, sketching the views freehand, and insisting on each pupil understanding the subject.

The object must be distinctly seen by the mind's eye before it can be drawn correctly. The difference between a plan, elevation, and perspective drawing must be clearly understood.

Make the following models if necessary (Construction from Educational Handwork—Kidner), viz.:—

Cube	page 134
Square prism	„ 135
Triangular prism	„ 118
Square pyramid	„ 136
Cylinder	„ 138
Cone	„ 139

SCALE DRAWING.

The Senior class should be able to draw a very simple and accurate scale, and from it to draw some plain object such as a picture-frame, window, etc.

Insist on accuracy, and be sure the work is understood.

LETTERING.

Good judgment should be shown in placing the name and date on the sheet. The printing should be direct, a regular slant, and well spaced, not with ruler and set-squares, but by the eye. The Roman capitals and lower-case letters should be mastered.

4. **Language Lessons**—Pronunciation, spelling, and meaning of ordinary words of text-books, including marking of accents and vowel-sounds.

Composition as in Sykes' Elementary Composition, pages 1-130 (but omit the following: The memorization exercises; loose, periodic, and compromise sentences; balanced sentence, explicit reference, parallel construction, transition, proportion, rhythm, climax, and sentence stress).

Grammar as in prescribed text-book.

Oral and written reproductions of substance of reading, literature, geography, history, and nature lessons.

Universal Spelling Book, Parts I. to VII. inclusive.

5. **Arithmetic**—Milne, Book II., page 146 to end of book, and Book III. with the following omissions: Pages 116-134, inclusive; from beginning of section 273 on page 160 to end of page 174; pages 231-234, inclusive; pages 238-241, inclusive; from beginning of section 407 on page 245 to end of page 247; pages 255-257, inclusive; pages 268-296, inclusive; pages 302-312, inclusive; from beginning of section 564 on page 314 to end of section 573 on page 316; pages 319-330, inclusive. Rapidity and accuracy in mental arithmetic should be secured.

The following grading of the work for a two years' course is suggested:—

FIRST YEAR—Milne, Book II., page 146 to end of book.

SECOND YEAR—Milne, Book III., with omissions as stated above.

6. **Geography**—As in prescribed text—Dominion School Geography, B.C. Edition (Part I. should be studied and considered, as far as possible, in connection with the presentation of related matter in the lessons of Part II.); also Lawson and Young's History and Geography of British Columbia, revised edition. (W. J. Gage & Co.)

NOTE.—A more careful and detailed study of the subject should now be insisted upon. Special attention should be given to the geography of the British Empire. A thorough knowledge of the geography of British Columbia and of Canada should be required.

7. **History**—History of England as in the text-book. (Symes & Wrong.) History of Canada. (Gammell.)

Finger-Posts to British History (Thomas Nelson & Sons) will be found an excellent teacher's aid in British History.

NOTE.—Care must be taken at the beginning of the work in the Senior Grade to teach the pupil how to make use of a book. Up to this time his history has been entirely oral. He must now be taught the art of studying the facts for himself from a text-book.

8. **Nature Lessons** (in correlation with Drawing)—

(a.) **Nature Study**—The work of the Intermediate Grade extended. Britain's Elementary Agriculture and Nature Study, pages 1-184 (omitting Chapters XIX., XX., XXI., and XXVIII. in the first year's work, and Chapter X. and pages 161, 162, and 163 of Chapter XI. in the second year's work). The suggestions for the Intermediate Grade should be carefully observed by Senior Grade teachers. Especial care must be taken that the lessons in Nature Study do not degenerate through the system of "giving notes" into a mere exercise of verbal memory. The text-book may be used by pupils of this grade.

NOTE.—The aim of this subject must always be kept in view, namely, to teach pupils to observe and to reason from such observations. It is, therefore, not enough to show a specimen or to perform an experiment, there must be examination, discussion, questioning by teacher and class. Nor is it necessary that apparatus for the chemical part of this work should be supplied to each pupil—two or three sets are all that is required by an ordinary class, providing that the pupils are compelled to take part in the actual experimentation, and thus to become interested. The success of any teacher will depend on the use made of material rather than on its quantity.

These lessons must be correlated with the out-of-school life of the pupils, thus: Let the pupils understand that Chapter XI. is not merely a study of the contents of the potato tuber, but a study of any vegetable substance; remind them that the presence of charcoal in sugar can be observed in the home oven as well as in the school-room. Similarly with other portions of the book, it is intended as a "guide" or "text"; but the application must be individual, and made so by the teacher.

In the Senior Grade both teacher and class are provided with the text-book; this must be carefully followed, and the purpose of an examination is to see whether knowledge has been gained therefrom. The chief points to avoid are:—

- i. Using any of the technicalities of science teaching by going deeper into the various subjects than the text-book requires;
- ii. Giving much lecturing or many "notes." Ideas should be fixed by questioning and discussing;
- iii. Doing the work without any assistance from the class. Let the pupils do as much as possible, the teacher merely guiding.

As an illustration, let us notice Chapter IV. This is a lesson on which the teacher is very apt to enlarge, whereas sufficient general knowledge regarding plant-life has been gained in the previous grades, and this chapter should be used only to review, and to complete previous lessons as given in the Intermediate Grade.

Chapter VI. can also be gone over sufficiently in three lessons so as to give the class a general idea of insect-life and its relation to plants, animals, and man, thus:—

First Lesson—Trace the life-history of some one common insect, e.g., a butterfly, from specimens of its various life-stages of development. Neglect entirely all biological detail of this development:

Second Lesson—Discuss insect-life in the economy of Nature—fertilization of flowers—carrying away of decaying material. Show why insects become injurious to the garden and farm; how the ravages of insects can be lessened or prevented.

Third Lesson—Divide insect-life broadly into two classes in relation to man; the useful—bee, silkworm, etc.; the harmful—housefly, mosquito, etc. Discuss their respective relation to man, illustrating (if possible) by drawings and specimens.

9. **Manual Training and Domestic Science**—For High School Entrance requirements in these subjects see pages 69, 71.

Notes on Drawing.

POINTERS FOR THE TEACHER.

Always be sure the pupils have a good view of the object or group of objects which they are expected to reproduce.

Do not fix a small flower on the blackboard for the whole class to draw from, and expect good results.

Do not place the objects always below the level of the eye, but in all manner of unusual positions.

Be prepared for the lesson. Know what you are going to do some time in advance; do not decide on the subject five minutes before the commencement of the lesson.

Be methodical. Have a plan.

Let your lesson bear upon and emphasize some other previous lesson if possible.

Thoughtful, well-organized lessons give a high average result.

Three Steps in Colour-work for the Teacher.

III.

MATERIALS.

Reeves' Three-colour Box.
Separate dish for water.
Paint-cloth.
Direct the pupils to be careful of the paints and brushes.
Must not dry the brush by rubbing it on the cloth.
Must not pull the hairs out.
Put brush away damp, with hairs drawn gently to a fine point.

Lift the superfluous colour at the bottom of the sheet with the dry brush and return to the box.

Let the wash dry.

Do not try to patch up any spots or defects whatever.

Do not add a second wash until the first is thoroughly dry.

Put the initials or name very neatly on the sheet.

II.

AIM.

To master the handling of the materials and be prepared to paint such things as simple leaves, flowers, fruit, vegetables, and easy objects.
Encourage the children to watch the mass form.

Flood the colour on the paper, working from side to side.

Always keep the brush well charged with colour, and a ridge or drip of colour always at the bottom edge.

Thus the wash will have a tendency to float down the paper and lie comparatively flat.

I.

Have a pool of colour mixed.

Hold the paper by the top left-hand corner, and slightly inclined.

Keep watch on the quantity of water used.

Use a large brush, and try to develop confidence in the use of materials.

Place the colours and water at the right-hand side of the pupils.

A Series of Lessons in Colour-work.

- I. Have a talk about the colours. Primary colours. How to take care of them. The washing and care of brushes, etc.
- II. A wash of yellow.
- III. A wash of blue.
- IV. A wash of red.

- V. How to paint fine lines with the point of the brush. Method: Dip into the pool of colour. Draw the brush over the edge of the box-lid until nearly all the colour is out of the brush. Hold the brush vertically.
- VI. More fine lines.
- VII. Wash of green.
- VIII. Wash of purple.
- IX. Wash of orange.
- X. Rainbow wash—that is, practice in running one colour into another.

Introduce as much interest into these exercises as possible. Thus the children will master the difficulties in handling the materials, and be prepared to paint such things as simple leaves, fruit, flowers, and easy objects.

ART TEACHERS.

Special Teachers or Supervisors in Art in both Public and High Schools must hold British Columbia Certificates of Qualification. These certificates will be granted to applicants holding Art Specialist Certificates from other Provinces of the Dominion, or to those having approved professional standing and who hold certificates from any recognized institution in either the United States or the United Kingdom. Every application for a certificate must be accompanied with the usual fee of \$5 and a satisfactory testimonial certifying to the good moral character of the applicant.

COURSES OF STUDY AND REGULATIONS FOR MANUAL TRAINING SCHOOLS.**Instructors' Qualifications.**

PHYSICAL TRAINING.

The Education Department has accepted the conditions of the Strathcona Trust for the encouragement of physical training in the Public Schools. Regular and systematic instruction in physical training, according to the syllabus laid down in the prescribed text-book (Syllabus of Physical Exercises for Schools, published by the Executive Council, Strathcona Trust), is compulsory.

Every Special Teacher or Supervisor of Physical Training must hold at least the Certificate of Physical Training Instruction issued by the Militia Department in accordance with the regulations approved by the Executive Council, Strathcona Trust. Qualified teachers must give instruction in this subject to their classes daily.

The following subjects may also be included in the Course of Study: Music, needle-work to Intermediate Grade and Senior Grade pupils, and in special cases, subject to the approval of the Department, some of the subjects of the High School Course.

For schools of four or more teachers the work of the Junior and Senior Grades

may be subdivided into two sections each; but in order to prevent loss of time which results to pupils from a too frequent change of teachers, it is recommended that no further subdivisions of the course be made.

Pupils of greatly unequal ability or attainments must not be required to work in the same class, and as many classes must be formed in any school as are necessary to secure this end. There must be in all graded schools a general classification at least twice a year for the Intermediate and Senior Grades, and three times a year for the Junior Grade. Pupils should be transferred to a higher or lower class whenever it appears that their individual interests require it, without regard to the periodical reorganization of classes.

Special examinations held for the purpose of classifying the pupils of a graded school shall be oral for classes below the Intermediate Grade, but in all classes the judgment of the teachers who have respectively taught the pupils during the preceding term should chiefly determine the promotion list.

The Department will hold annual examinations on the work of the Senior Grade, and will issue certificates of High School admission to candidates who obtain at least 34 per cent. on each subject and not less than an average of 50 per cent. on all subjects. Candidates from schools in which instruction is given in Manual Training and Domestic Science must obtain approved standing in these subjects.

The examinations for admission to High Schools will be held on Monday, Tuesday, and Wednesday preceding the last Friday of June. These examinations will be held at all places where High Schools are in operation, and at such other centres as will be determined and announced by the Department from year to year.

Pupils of Public Schools in a school district having a High School, after passing a satisfactory examination and being declared eligible for promotion from a Public School to a High School, shall not be received as pupils in the graded schools of such district.

All pupils of British Columbia schools (both public and private) must hold High School Entrance Certificates before being eligible for admission to a High School. Any pupil holding a High School Entrance Certificate from another Province, or any pupil who can produce satisfactory proof of having done High School work elsewhere, may be admitted to a High School on probation, subject to the approval of the Department.

COURSE OF STUDY AND REGULATIONS FOR SUPERIOR SCHOOLS.

1. The chief aim of the Superior School is to supply instruction in the higher branches for the benefit of rural communities which could not hope to be in a position to secure the establishment of a regular High School. Superior Schools may be established in District Municipality School Districts and regularly organized Rural School Districts, and will be required to teach the subjects peculiar to the Senior Grade of the Public School Course, and to the Junior Grade of the High School Course.

2. *Superior Schools in District Municipality School Districts.*—The first or highest division of the school chosen as the location of a Superior School in a District Municipality District may form a Superior School, and shall not thereafter be called upon to perform work under the Senior Grade of the Public School Course. It is suggested that all the advanced pupils of the district be required to attend the Superior School or Superior Schools established in the district.

3. *Superior School in Regularly Organized Rural School District.*—No ungraded school shall be created a Superior School.

COURSE OF STUDY FOR HIGH SCHOOLS.

An examination of each grade of the High Schools will be held by the Education Department, and those candidates only may be advanced to regular standing in a higher grade who have successfully passed such examination. Every candidate to be successful must obtain at least 34 per cent. of the marks attached to each subject of examination, and not less than an average of 50 per cent. on all subjects.

The Council of Public Instruction has ruled that, in view of the different requirements for Arts and Applied Science Matriculation, candidates at the Junior Grade High School Examinations who declare their intention of taking the Applied Science Course of McGill University shall be allowed to offer for Junior Grade High School Standing only one foreign language, viz.: Latin, or Greek, or French, or German.

Junior (Preliminary or Advanced), Intermediate, Senior, and Senior Academic Certificates will be issued to those students who succeed in passing the examinations prescribed for the Junior (Preliminary or Advanced), Intermediate, Senior, and Senior Academic Grades, respectively. The examinations will begin on the Monday preceding the last Friday in June.

[It is expected that the work of this grade will be accomplished in two years.]

PROVINCIAL NORMAL SCHOOL.

REGULATIONS RESPECTING THE PROVINCIAL NORMAL SCHOOL.

Establishment.

The Provincial Normal School of British Columbia was established in 1901, to give professional training to the Public School Teachers of the Province. Until October, 1909, classes were held in the rooms at various schools in the City of Vancouver, these having been placed at the disposal of the Education Department by the Board of School Trustees. During 1908-09, a suitable building was erected by the Provincial Government on grounds adjacent to the Model School, and thus the students-in-training will still be enabled to continue their use of classes in this Model School, for observation of the work of experienced teachers and also for their own practice work.

Admission.

Persons who are eighteen years of age, or who will attain the age of eighteen years at the termination of the session attended, may be admitted to the sessions of the Provincial Normal School; provided that they hold either—

- (a.) A Junior Grade Certificate, or any higher certificate from a High School of this Province; or
- (b.) A Model School Certificate of another Province; or
- (c.) Have taught for one year on a Third-class Teacher's Certificate of this Province.

Sessions.

There are two sessions held in each year, namely:—

1. A preliminary session, extending from the first school-day in August to the middle of December:
2. An advanced session, extending from the first school-day in January to the end of June.

Each applicant for admission must give notice to the Principal ten days before the commencement of the session, and must lodge with him a satisfactory certificate of good character, dated within three months of the time of presentation. Forms of application can be obtained from the Principal.

The work of this session will include the course of study outlined for the Preliminary Session, but the course will be more complete and advanced. The following subjects will be taken in addition:—

A higher standard of proficiency will be required in each subject of instruction, as well as in practical teaching.

No special examination is held at the end of the session, except in the subject of School Law, but an accurate account is kept of all essays and exercises handed in, and of the criticisms made by the Normal School Staff and by the teachers of the Practice School on lessons given by students. The teaching ability of students will be judged from these reports. The general behaviour, attendance, progress, and aptitude of students will also be taken into account in recommending them to the Education Department for diplomas.

(b.) The books shall be covered with stout paper. Each volume shall be numbered on the back of cover. On the inside of the front cover shall be pasted a written or printed label giving the number of the book and the name of the district or school. The books should be kept (when not loaned to readers) in a suitable book-case, under lock and key, provided by the Trustees; glass doors are recommended. It is also recommended that a dictionary for reference form part of the equipment, and that it be kept outside the library; all pupils above the junior grade should know how to use it and should be accustomed to refer to it.

(c.) Each book loaned should be entered by the librarian in a book to be provided for that purpose, as in the following form:—

Date of Delivery.	No. of Book Delivered.	To Whom Delivered.	When Returned.	Condition when Returned.	Fine for Detention.	Fine for Injury.	When Paid.

(d.) A book loaned to a member of a family in which infectious disease has broken out should not be returned to the library, but its value should be promptly paid and a new book obtained.

(e.) No person shall be allowed to have more than one volume at a time, or to retain the same longer than two weeks; nor shall any person who has incurred a fine by these regulations receive a book while such fine remains unpaid.

(f.) On the return of every book to the library, the librarian shall examine it carefully to ascertain what injury (if any) has been sustained by it, and shall charge the amount of the fine accordingly.

(g.) The following fines shall be assessed by the librarian as herein provided:—

1st. For detaining a book beyond two weeks, 5 cents a week.

2nd. For the loss of a volume, the cost of the book, and if one of a set, an amount sufficient to purchase a new set.

3rd. For a leaf of the text torn out or lost, or so soiled as to render it illegible, the cost of the book; or if one of the set, the cost of the set. In either of the above cases the person paying the fine shall be entitled to the book or set so injured.

4th. For any injury beyond ordinary wear, an amount proportionate to the injury, to be estimated by the librarian, subject to revision upon appeal by the Board of Trustees.

5th. Whenever any book shall not be returned within six weeks from the time it was loaned, it shall be deemed to be lost, and the person so detaining it shall be charged with its cost.

(h.) All books belonging to the library shall be called in and placed in the book-case during the last week of the term, and no book shall be loaned during vacation.

(i.) On the last Friday of each term the librarian shall make out and forward to the Secretary of the School Board a statement showing the number of volumes lost during the term and the amount of fines collected, the number and cost of the books purchased during the term, together with such other facts and suggestions as may be of interest to the Trustees and ratepayers. This statement should be kept on file by the Secretary for future reference. In case of a librarian leaving a district before the end of a term, he shall, before leaving, submit to the Secretary of the Board a report as above indicated.

(j.) It shall be the duty of the teacher, before assuming charge of the school library at any time, to ascertain whether or not the number of volumes in the library and their condition correspond with the last report to the Secretary of the Board and with the librarian's book left by his predecessor. In case of his finding any discrepancy, he shall report the same in writing to the Secretary of the Board.

NIGHT SCHOOLS.

(UNDER SECTIONS 127, 128, AND 129, "PUBLIC SCHOOLS ACT.")

A portion of the instruction provided in any school district may, if deemed desirable by the Board of School Trustees, be through the medium of night schools, subject to the following regulations:—

1. Night schools are public schools under the immediate charge of the Board of School Trustees, just as are the day schools, except that the sessions are held at night. No night schools shall be started by a School Board, however, without the approval of the Council of Public Instruction, nor where they will directly or indirectly interfere with the efficient administration of the day schools. The regulations for the government of day schools shall, as far as possible, apply to night schools established under sections 127, 128, and 129, "Public Schools Act."

2. Night schools shall be for the free instruction (in the ordinary branches of an English education) of persons of the age of fourteen years and upwards who may be debarred from attendance at the day schools. No person shall be admitted who could conveniently attend a day school.

3. Any such night school shall be in session two hours. The prescribed register shall be kept, and the regular monthly and annual reports made in the form directed by the Superintendent of Education.

4. The prescribed text-books shall be used in night schools, and those on the free list shall be supplied in the same manner as for day schools.

5. Night schools shall be graded according to the attainments of the pupils, but owing to the diversified attainments of the persons likely to seek admission, the Council of Public Instruction does not think it expedient to lay down a precise course of study. The Act under which night schools are established contemplates only "the ordinary branches of an English education," and the Council directs teachers to place chief stress on these, particularly on reading, writing, arithmetic, drawing, and composition (including letter-writing). In mining and agricultural districts, informal lessons on elementary science may profitably be given.

6. No portion of the cost of maintaining night schools shall be paid from the Provincial Treasury, unless taught by the holders of Provincial Certificates or other certificates acceptable to the Council of Public Instruction. In all cases the Council would greatly prefer that the teachers of night schools should be other than teachers of day schools; but where this may not be practicable, the Board of School Trustees may permit the teacher of a day school to teach four evenings in the week.

HIS MAJESTY, by and with the advice and consent of the Legislative Assembly of the Province of British Columbia, enacts as follows:—

Short Title.

1. This Act may be cited as the "Schools Health Inspection Act." 1910, c. 45, s. 1.

Appointment of Health Inspectors.

2. The Board of School Trustees of every city, town, and district municipality school district in the Province shall appoint one or more School Health Inspectors, shall assign to each such Inspector the schools to be inspected, and shall provide them with proper facilities for the performance of their duties as Health Inspectors of Schools and School Children. 1910, c. 45, s. 2.

3. All appointments made under the provisions of this Act by the Board of School Trustees must be made subject to the approval of the Provincial Board of Health; and the dismissal of officers appointed by the said Board of School Trustees must be subject to confirmation by the said Board of Health. 1910, c. 45, s. 14.

4. School Health Inspectors shall be duly qualified medical practitioners: Provided, however, that the Provincial Board of Health may from time to time appoint persons other than School Health Inspectors to perform such duties as the said Board of Health may deem necessary or expedient. 1910, c. 45, s. 4.

5. The Provincial Board of Health shall appoint, in districts outside municipalities, one or more School Health Inspectors, shall assign to each Inspector the schools to be inspected, and shall provide them with proper facilities for the performance of their duties as Health Inspectors of Schools and School Children. 1910, c. 45, s. 3.

Powers and Duties of Health Inspectors.

6. (1.) Every School Health Inspector shall forthwith upon his appointment, and thereafter at least once in every school year, or oftener if required by the Board of School Trustees, make a thorough examination as to the general health of all children attending school in the district of which he is such Inspector, and of all teachers and janitors in such district. He shall also carefully examine all school buildings and school surroundings in his district, and shall report to the said Board, fully and in detail, the result of such examinations. In such report he shall state whether or not he considers that the condition of health of any child, children, teacher, or janitor (naming them) is such as to endanger the health of the children at such school, and shall set forth his recommendations as to the school buildings and school surroundings.

(2.) The Board of School Trustees for the district shall forthwith act upon such report, and shall remove from the school any child or children, teacher, or janitor whose health is so reported by the School Health Inspector as being dangerous to children in such school, and such child, children, teacher, or janitor shall not be permitted to return to school in such district unless and until he or they deliver to the said Board a certificate in writing, signed by such Inspector for the district, permitting such return. 1910, c. 45, s. 5.

7. The School Health Inspector shall have supervision over all physical exercises of pupils attending school, and in special cases may modify or prohibit such exercises. 1910, c. 45, s. 10.

8. The School Health Inspector shall, on the demand at any time of the Provincial Board of Health, make a report on the health conditions of the children attending any particular school or schools, or on any other condition in or around the school which might affect the health of the children. 1910, c. 45, s. 16.

9. An annual report shall be made at the termination of every school year by the School Health Inspector to the Provincial Board of Health; such report to be in such form as the Provincial Board of Health may require. 1910, c. 45, s. 15.

Remuneration of Health Inspectors.

10. The School Health Inspectors appointed under this Act in cities and municipalities shall receive such remuneration for their services, by salaries or fees, as may be agreed upon by the authority appointing them, and such remuneration shall be deemed to be part of the general expenses of the school district, and shall be raised and collected in the usual method of raising school funds. 1910, c. 45, s. 11.

Duties of School Trustees.

11. The Board of School Trustees of every school district in the Province shall cause every child in the public schools to be separately and carefully tested and examined at least once in every school year as to the condition of sight and hearing, of throat and teeth, and as to any other physical disability or defect liable to prevent his receiving the full benefit of his school work, or as to whether he requires a modification of the school work in order to secure the best educational results. The tests of sight and hearing may be made by teachers having authority from the Provincial Board of Health. The Board of School Trustees shall cause notice of any such defect or disability requiring treatment to be sent to the parent or guardian of the child, and shall require a physical record of each child to be kept in such form as the Provincial Board of Health shall prescribe. 1910, c. 45, s. 6.

12. (1.) The Board of School Trustees, or teacher in charge, shall cause to be referred to a School Health Inspector (who in such case must be a duly qualified medical practitioner) for examination and diagnosis, as follows:—

(a.) Every child returning to school without a certificate recognized by the local health authorities after suffering from or being exposed to any contagious or infectious disease:

(b.) Every child who has been absent on account of illness or from unknown cause:

(c.) Every child who shows signs of being in ill-health or suffering from contagious or infectious disease, unless he is at once excluded from school by the teacher.

(2.) No child so referred to the School Health Inspector shall be permitted to return to school unless and until he delivers to the teacher in charge of the school a written certificate, signed by such Inspector, permitting such return.

(3.) In the case of schools in remote and isolated situations, the Board of School Trustees or teacher may make such other arrangements as may best carry out the purposes of this Act. 1910, c. 45, s. 7.

13. Whenever a child shows symptoms of small-pox, scarlet fever, measles, chicken-pox, tuberculosis, diphtheria, or influenza, tonsillitis, whooping-cough, mumps, scabies, ringworm, trachoma, or any other contagious or infectious disease, he shall immediately be sent home by the teacher in charge, or as soon as a safe and proper conveyance can be found, if such is necessary, and the Local Board of Health and Board of School Trustees shall at once be notified by such teacher. 1910, c. 45, s. 8.

14. It shall be the duty of the Board of School Trustees of each school district to see that the provisions of the "Health Act" are carried out as regards the pupils attending school in their district. 1910, c. 45, s. 12.

15. The Boards of School Trustees of city and municipal school districts may pass by-laws and regulations for the better carrying-out of the provisions of this Act, but the approval of the Provincial Board of Health shall be procured to such by-laws and regulations before they become operative. 1910, c. 45, s. 13.

Further Powers of the Provincial Board of Health.

16. The Provincial Board of Health shall prescribe the directions for tests of sight and hearing, and shall prescribe and furnish forms for test-cards, blanks, record-books, and other useful appliances for carrying out the purposes of this Act. 1910, c. 45, s. 9.
